

Sarojini Naidu Government Girls P.G. (Auto.) College, Shivaji Nagar, Bhopal

BEST PRACTICE – I

LEGAL AID CLINIC

BEST PRACTICES

BEST PRACTICE I

1. TITLE OF THE PRACTICE

LEGAL AID CLINIC

2. OBJECTIVES OF THE PRACTICE

- To provide services to the poor and weaker sections of the society.
- To provide inexpensive local machinery for handling legal services of basic nature like legal advices, drafting petitions, notices, replies and other documents of legal importance.
- To resolve disputes of local people through mediation and conciliation and thereby preventing the disputes from reaching courts.
- To conduct various awareness programs like lectures, seminars and workshops to empower knowledge to the students about their rights and duties.
- To conduct surveys or research based programs.

3. THE CONTEXT

In the backdrop of Poverty and Inequality, Legal Aid is an effective way towards attainment of the ideals of 'Social, Economic and Political' Justice that are enshrined in the preamble of our constitution. Imparting legal awareness is the first step towards ensuring prompt and effective access to justice. In light of this, the college made the decision to create and administer a legal aid clinic. Department of Justice took project to strengthen access to justice for marginalized particularly women, minorities, scheduled cast and scheduled tribes. On the basis of this context **LEGAL AID CLINIC** was launched under the National Legal Services Authority scheme 2013, in collaboration with District Legal Services Authority and State Legal Services Authority on **29th June 2021**, which was inaugurated by **Honorable Judge High Court Of Madhya Pradesh, Mrs. Nandita Dubey**, our alumnus with the aim to spread legal awareness among students and people at large.

4. THE PRACTICE

- The Legal Aid Clinic is managed by volunteers (students) and faculty members with

sense of commitment, sensibility and sensitiveness to the problems of the needy person.

- The Legal Aid Clinic is regularly open Monday to Friday from 1 to 3 p.m. DLSA appointed two attorneys to ensure that the College's Legal Aid Clinic runs smoothly. It is a unique practice in which student team assists litigants in speedy disposal of their cases at *Lok Adalat* at District Court.
- Weekly visit by advocates Mrs. Chanda Thakur and Ms. Anjali Roy in LAC of college for legal counseling and undertaking their legal proceedings.
- The Legal Aid team was trained by DLO Mr. B.M Singh on the topic *Lok Adalat Management* On 23rd July 2021.
- 5 students visited the District Court and participated in National *Lok Adalat* on 11th September 2021 and learned about the legal proceedings
- An Orientation program (dated 15-09-2021) on "Aims and Objectives of Legal Aid Clinic" was organized on Zoom Meet which was attended by 885 students were enlightened by which **Shri S.P.S. Bundela** Secretary District Legal Services Authority
- *International Girl Child Day* was organized on 11th October 2021, in which Dr. Raka Arya delivered the lectures and discussed on the topic – Sexual harassment at Work Place.
- The second visit to *Lok Adalat* on 11th December 2021. A team of 18 students, along with faculty members studied about the legal procedures and legal activities which were guided by Chairman, DLSA & Principal District & Session Judge, Bhopal (M.P).
- NLUI students from Delhi, Aligarh, Nagpur, Gandhi Nagar, Kolkata and Kerala visited the Legal Aid Clinic of SNGGPG College on different dates for one day internship programs.
- *National Girl Child Day* was organized on 24-01- 2022, in which **Shri S.P.S. Bundela** Secretary District Legal Services Authority, on ZOOM platform discussed on the topic Female Feticide and Gender Equality.

5. EVIDENCE OF SUCCESS

- The Legal Aid Clinic is regularly open Monday to Friday from 1 to 3 p.m. DLSA appointed two attorneys to ensure that College's Legal Aid Clinic runs smoothly. It is a unique practice in which student team assists litigants in speedy disposal of their cases at **Lok Adalat** at District Court.
- Team of 18 Students participated in the National **Lok Adalat** proceedings conducted by District Legal Services Authority on 11-09-2021, in which about fourteen thousand court-referred matters and over four thousand pre-litigation matters were resolved
- A letter of appreciation was provided to LAC Team of college by Principal District and

Sessions Judge Bhopal and *Chairman DLSA Mrs. Giribala Singh*

- College organized an orientation program on working of the Legal Aid Clinic held on 15th **September 2021**. The major objective of the program was to make the students aware of the activities of the society, its working and constitution. The program was attended by more than 800 students of the College. The oriented students can guide, help and assist the people seeking legal advice.
- More than 25 cases were resolved by counseling and legal process which was coordinated by empanelled advocates and Legal Aid team.

6. PROBLEMS ENCOUNTERED AND RESOURCES REQUIRED

- Although there were initially insufficient infrastructure amenities, the college has made provisions for the most basic ones. Stationery, a computer, a printer, and the sign and flex board of the Legal Aid Clinic were set up, and Zoom was subscribed for online meetings and programs.
- As it is their fundamental right, legal assistance will be successful when all the poor and needy are aware of it and benefiting from it. There are therefore measures to raise awareness in order to close those gaps in the legal assistance system.
- Although the LAC professor and student team is motivated and hardworking, the absence of designated full-time faculty has an impact on daily task monitoring and progress reports, especially when students are taking exams.

7. NOTES (OPTIONAL)

Legal Assistance contrary to other efforts, clinics just need a little initial financial expenditure. Most colleges can rapidly integrate them. It takes the Colleges to redefine and adopt a system of joint effort and sharing of duties, in order to undertake an endeavor of this kind in promoting access to justice. To have a successful legal aid movement in India, it needs to take appropriate steps by spreading awareness and educating the people about their basic fundamental rights. The only objective or aim should be to provide 'equal justice to all'.

BEST PRACTICE – II

**AWARENESS TOWARDS ENVIRONMENT AND
SUSTAINABILITY**

BEST PRACTICE II

1. TITLE OF THE PRACTICE

AWARENESS TOWARDS ENVIRONMENT AND SUSTAINABILITY

2. OBJECTIVES OF THE PRACTICE

- Promote ethos of conservation natural resources.
- Cultivating an eco-friendly culture on campus and making it environmentally sustainable
- To create a campus that is plastic-free, produce little waste, conserves energy, maintains biodiversity, and is self-sustaining in terms of power, water, and sanitation.
- Organize tree plantation drives and awareness programs regarding various environmental issues
- Organize Nature Trail in Wild Life areas to know about the Bio-diversity
- To develop an educational approach that is focused on compassion and mindful living.
- To make a collaborative effort amongst students, faculty, and the surrounding community to realize our place and responsibilities on the earth.

3. THE CONTEXT

As the world faces an increasingly critical need to address climate change the impact that water and energy conservation has on sustainable environment is undeniable in this context college has adopted different methods which benefits the budget and reduces air and water pollution and conserves natural resources.

Sarojini Naidu is a well-known educational institution with a varied range of energies. Because of its central location, it is susceptible to air pollution (i.e., the combustion of fossil fuels). As a result, the college has become increasingly concerned about environmental issues. With its green campus initiative, it protects its own environment and maintains a pollution-free campus where environmental friendly practises and education combine to encourage sustainable and eco-friendly systems on campus and enable students to take small steps toward environmental conservation. These efforts assist students in understanding their personal responsibility to take action to protect the environment, which is the pillar and the primary concern of the future of humanity.

4. THE PRACTICE

Students at the college learn about nature, climate change, protecting the environment and sustainability by adhering to the college's environmental policy and taking part in activities with the organisations with which the college has MOUs.

Plantation Drives

Plantation drives are carried out annually in which the seeds and the saplings are planted in the garden and utilizing the organic compost as manure under the programs like *Hara Bhopal Sheetal Bhopal ,Ek abhiyaan dharti ke shringar ka*.

Clean campus Drives

The college organizes Campus Cleaning drives with the goal of keeping the campus clean and encouraging student involvement in this activity, which taught students that it is their responsibility to keep the surroundings clean and make them aware of the importance of cleanliness. Keeping the college environment clean also sets a good example for other students.

Commemoration of several environmental days

Occasionally throughout the year, we are able to fully appreciate, revel in, and soak in the splendor of our planet, our surrounds, and the profusion of life that exists there. The college observes world ozone, ocean, population, earth, environment, biodiversity, water, sparrow days and many other in addition to World wild life week, Wetland week to bring attention to a variety of issues that are harming the environment and causing unnecessarily painful suffering to other life forms.

Training Programmes

To raise the degree of environmental understanding among students, environmental training programmes were established that included plant gardening, vermi-composting, and trash management.

Activities related to sustainable Growth

Increasing environmental activities are leading to environmental degradation, the participation of youth can make them feel concern for sustainable future. To encourage youth to make a positive contribution towards environment, lectures, Skit Elocution (Theme- *Ek abhiyaan dharti ke shringar ka*), Poem recitation, Poster making, Essay Competition and many such programs were organized in the college

Tours and visits

Educational tours offer students a wonderful opportunity to learn about environment in a relaxed setting. Colleges schedule trips to places like Ratapani sanctuary, Minor Forest Produced, and Walmi Campus for the purpose of empowering students. Additionally, teachers and students took part in the Bhopal lake deepening.

The college organizes Campus Cleaning drives with the goal of keeping the campus clean and encouraging student involvement in this activity, which taught students that it is their responsibility to keep the surroundings clean and make them aware of the importance of cleanliness. Keeping the college environment clean also sets a good example for other students.

5. EVIDENCE OF SUCCESS

- A rooftop solar power plant has lowered a monthly payment of Rs.1, 21,000 to Rs.65, 851.
- Solar lights are installed in the garden and save a lot of money while also being pollution-free.
- Rain Water Management System is equipped with Channelized Drain & Pipe Network, Rain Water Holding Tank, Pumps and Ground Water Recharge Pits
- The college also generates a large quantity of Garden waste, usually in the form of leaves, which is collected in a separate chamber and Vermi- composted and decomposed into manure for organic farming.
- The college has a repository of different seeds by the name of Seed Bank. A seed bank stores seeds to preserve genetic diversity; hence, it is a type of gene bank.
- Herbaria document of the college's flora and provide a constant and permanent record of botanical diversity. It is developed by the students and well conserved in Herbarium cabinets. This role is increasingly important as the rate of habitat destruction increases and climate change precipitates rapid changes in species' ranges and all aspects of their ecology.
- The college maintains a rich diversity of ornamental and medicinal plants in its Botanical Garden situated in the heart of the main building. It has two green houses for indoor exotic plants, Hydroponic unit, and a pond for hydrophytic plants and beds for ornamental and medicinal plants.

6. PROBLEMS ENCOUNTERED AND RESOURCES REQUIRED

- Greening initiatives are challenging and require determination and a long-term commitment on the part of the entire campus community. The pandemic has adversely affected our ongoing green initiatives. Maintenance of the lush green cover has been difficult due to the manpower availability being impacted by the lockdown. Due to the onset of COVID-19, (a) vermi-composting process had to halt the production of its manure, keeping the health of its beneficiaries in mind, (b) Plantation and care of garden was adversely affected (c) Awareness initiative could not be implemented at the student level.
- An inadequate supply of plastic alternatives increases their cost which makes them less available in society.
- Environmental education is impacted differently by factors including a more diverse society, more students, and a larger range of family backgrounds. Various audiences

should be served by environmental awareness programs that are adapted to the problems they face.

7. NOTES (OPTIONAL)

Human activities are placing a strain on the planet's resources, leading to serious environmental issues like ozone layer thinning, global warming, habitat loss, water and air pollution, and the fate of endangered species due to deforestation. In conclusion, the planet's environment is a priceless gift. A significant threat exists for our environment. The current imperative is to protect the environment. It is likely the largest issue facing humanity at the moment. In this aspect, any delay may be disastrous. The rise of information technology and the introduction of digital media may help to increase public awareness of the need to save the environment. The public must urgently be made aware of the effects of environmental pollution and degradation. Every student should also be made aware of how they contribute to environmental pollution and what can be done to reduce it, whether that means using more environmentally friendly energy sources or adhering to the 3Rs (Reduce, Recycle, and Re-use)
